How to remove the sign in password in Windows 10

There is a magical app for this and other administrator tasks

NETPLWIZ

(Network Places Wizard)

1. Launch a RUN COMMAND by holding the Windows + R key simultaneously

2. Type **netplwiz** and press OK or enter

1. Uncheck Users must enter a user name & password......

G Use the list be	elow to grant or deny users access to your	
computer, an	d to change passwords and other settings.	
Users must <u>e</u> nter a	user name and password to use this compute	er.
Users for this compute	er:	
User Name	Group	
Selarkg1139@gmai	il.com Administrators	
Sclarkg1139@gmai	il.com Administrators Add <u>R</u> emove Pr <u>o</u> pert	ties
Password for clarkg1	il.com Administrators Add <u>R</u> emove Pr <u>o</u> pert 1139@gmail.com	ties
Password for clarkg1 To change Users.	il.com Administrators Add <u>R</u> emove Proper 1139@gmail.com your password, go to PC settings and select	ties

2. Then click - Advanced tab

Uncheck Require users to press Ctrl+Alt+Delete

You c		
104.0	an manage the pa	asswords you have stored on this computer
		Manage Passwords
Advar	ced user manage	ement

		Advanced
Secure	e sign-in	
Secure	For added sect	urity, you can require users to press
Secure	For added sect Ctrl+Alt+Delet authentic Wind system from pi password info.	urity, you can require users to press te before signing in. This guarantees that th dows sign-in screen appears, protecting the rograms that mimic a sign-in to retrieve

Hit "OK, then Apply."

When prompted, re-enter your password to confirm the changes.

Click "OK" once more. Your password will then be removed.

Note:

When you click *Apply* it will prompt you for your current password. Enter it twice and you're finished. The next time you reboot, or your PC wakes up from a nap, you'll no longer need to type in your password.

Possible problem:sometimes this line with checkbox is missing aftersome Windows 10 updates

Use the list b computer, ar	below to grant or deny users access to your nd to change passwords and other settings.
Users must <u>e</u> nter a ers for this comput	a user name and password to use this computer.
