

# Windows 11 Hurdles

# Windows 11 Hurdles

This is what Windows 11 looks like when you start your PC

Microsoft heralds that Windows 11 is the best  
Operating system ever created!

I am not convinced that W11 is user friendly for everyone.

**After the upgrade :**

**All Tiles have vanished**

**Folder with Apps will be axed**

**Wallet has been removed**

**Windows 7 Games & Gadgets axed**

**Skype will not survive the upgrade. You lose all your Skype contacts. One has to manually download Skype again from Windows store and start from scratch to rebuild contacts.**

Many of our Students have Laptops that are 4 or more years old. Probably not as old as the 1995 COMPAC shown below but any Computer older than 3 years is classified as “snow from yesterday!!”

Microsofts new Operating system, Windows 11 is about to be released and available as from beginning of November 2021. Are our older Laptops ready for it?

Unfortunately Windows 11 has certain requirements on older Computers for this upgrade.

You first of all need to have in your existing system a “TMP” = Trusted Platform Module .

Windows 11 also looks for more recent Processors and for example INTEL Pentium / Celeron processors

Disqualify you from the upgrade.

To find out whether your laptop or desktop PC has “TMP” You must do following checks:

➔ Serious see next page

Go to Start - click on Settings -  
select "System" - click "about" -  
select "related Settings" - navigate to  
"Bitlocker options" select "Status"  
and click "confirm TMP"

**If this check does not work a lot of things can happen:**

## Big error

You really screwed up this time.

I know

What else is new

## Windows VirusScan 1.0

Found infected file: "Microsoft Windows"

Remove it?

Yes

No

# Do not despair – keep your temper !

Not this way:

**Not necessary to follow  
Microsoft suggestion to  
buy a new PC :**

A photograph of a Microsoft Surface Laptop 4. The laptop is open, and the screen displays a scenic landscape with a body of water, sand dunes, and mountains under a blue sky. The laptop is silver and has a black keyboard.

**\$2,556.00**  
Microsoft Surface Laptop 4  
15-Inch I7/16GB/512GB SS...

Help is near

**Moses—meet Peter Whalan**

**He's gonna upgrade**

**Your tablets for Windows 11 !**

Once you have completed your checks and a “TMP Module” is not in your System you will be **unable** to upgrade to Windows 11

**Keep your old Laptop - no matter how old – as long as it works even if a bit slow...continue using Windows 10!**

Microsoft will continue to support Windows 10 until 2025 !

**Windows 11 upgrade is free for initial 6 months. Thereafter it cost 180-240\$ !**

If your PC meets the requirements of Windows 11 I strongly recommend to wait with the update until around February /March 2022. I have gone thru the BETA Version of Windows 11 and found many new features users might not like. The new O.S. has still a lot of teething problems . Wait with the Upgrade. Let Microsoft fix the shortcomings / bugs first !

That's all folks!

Anne Matthews will receive a  
PDF Version of this Slide show for  
Distribution

Have a nice day!
